The Flinders Ranges provide the ultimate Australian Experience. Rugged ridges and ancient gorges lined with massive gum trees, through to the unending expanse of the Australian Outback. Add to this an abundance of Australian wildlife and you have everything that is Australia.

We are now in the habitat of Australia's famous wildlife - not only kangaroos and emus live here in abundance, but also many species of birds and reptiles. From here, we continue the tour in to the heart of the Flinders Ranges through vast sheep station country. There will an opportunity to stop at one of the Ghost Towns for some stories and photos.

Day 7

We head down the Stuart Highway to Glendambo and past Lake Hart to Pimba, where a slight deviation takes us to Woomera - the base for the Nurrungar deep -space tracking station. Development of Woomera Village was born out of the need for Britain to develop its military capability following a number of attacks during the closing stages of World War II. Most significantly were strikes by the V2 long range ballistic missile, the first to be used as a weapon of war. These events identified a substantial gap in Britain's defence capabilities and as a result the search for a suitable testing range began. In April of 1947, following several initial investigations of the area by representatives from the British government, Arcoona Station land was leased to the Department of Defence.

Len Beadell surveyed the area and construction started soon after.

We visit the Woomera Heritage Centre where there is information about the Range activities, and the legendary Len Beadell OAM.
